

Green Fleet Programme

Helping your fleet become greener.

It can be difficult to understand all the environmental claims made by manufacturers. We can help you choose more environmentally friendly vehicles by giving you the option to trial greener vehicles.

Our service.

The Green Fleet Programme is supported by key manufacturers who provide a selection of their latest environmentally-friendly vehicles, for you and your drivers to evaluate free of charge.

You can choose from 50 different vehicles to test and compare*.

*Subject to availability.

Green Fleet Programme – the benefits.

The Green Fleet Programme gives your drivers the chance to test drive different vehicles from a variety of manufacturers. It allows them to compare like for like and may help them to consider greener vehicles therefore reducing their taxation and your fuel costs along with promoting an environmental policy.

As you trial the vehicles for up to 2 weeks, there are a number of opportunities to drive the vehicles giving you a much clearer picture of their suitability for your fleet in a variety of different conditions.

Green Fleet Programme includes:

- Choice of up to 50 vehicles from a variety of manufacturers
- Delivery available to your business for up to 2 weeks
- Environmental analysis to help you decide your policy
- Manufacturer's environmental support literature.

How it works.

Together we compile a shortlist of the best vehicles for you to trial. While working with manufacturers, we agree a convenient time and place for the vehicles to be delivered to your business. Once the trial has taken place we ask that all drivers complete a short report providing feedback on the vehicle.
