

LEX AUTOLEASE

KEEPING ELECTRIC VEHICLES UP TO SPEED WITH POD POINT

Electric Vehicle charging made easier.

With the introduction of 'plug-in' Electric Vehicles (EVs) into the UK market, Lex Autolease, the leading fleet management and fleet funding specialist can now help customers have a safe, cost effective and convenient method of EV charging.

We've joined up with POD Point to introduce our customers to a comprehensive charging package to help them get the best out of their Electric Vehicles.

THE PRODUCT

POD Point products are both high in quality and cost effective and Lex Autolease has negotiated a competitive price to give our customers a great deal.

The 'Solo' charge system which is ideal for domestic installations and single charging in car parks. In addition a 'Twin charge' post is also available and perfectly suited for multiple charging in car parks and offices.

Lex Autolease can introduce you to POD Point whose service includes:

- Supply and installation of charging unit
- Free online accounts to monitor your electrical usage and CO₂ emissions
- Automatic employee expenses upload which provides charge usage information
- Opportunity to pay outright for equipment or spread payments over a period of time

THE BENEFITS

Easy to use: the charger includes the right connector for your vehicle on a tethered lead. Can be locked in place to prevent unauthorised unplugging of the charger.

Avoid damage: ensuring that the correct charging equipment is used avoids the risk of damage to your vehicle.

Value: this product provides excellent value for money and is approved by major electric vehicle manufacturers.

Safety: it is very safe to use with multiple safety cut-outs.

Tracking usage: there is the potential to calculate and track the cost of business mileage.

Quicker charging: dedicated charging point that typically charges a vehicle up to a third quicker than a standard socket.

NEXT STEPS

Customers are eligible for these exclusive, preferential rates when we pass on your details to POD Point.

Twin charge post
